

Dear Dinara,

I am very sorry to hear that.

Please accept my condolences; please pass them to his wife and other water colleagues.

Victor Abramovitch was/is a legend in the water sector for Central Asia.

I was always impressed how well prepared he was for every meeting and event. I remember my last encounter with him at a Nukus Workshop (maybe in 2019) on the future of the Aral Sea, he and Galina Stulina, presented on recent fieldwork on small drainage lakes in Karakalpakstan.

I was very happy to see him.

Warm regards, and thank you very much for informing.

Kai Wegerich
